

# RECYCLE

## SMARTPHONES, TABLETS & SMARTWATCHES

### What happens to your equipment?

They are recycled for their precious metals or “wiped” and refurbished, sent to developing countries with less advanced cellular technology.

### Are these things dangerous when thrown away?

These things contain dangerous metals- lead & cadmium released from phones will break down in landfills. These can cause cancer and reproductive and developmental disorders and when released in small quantities, leach into soil and drinking water.

Drop off at  
Dorr Township  
Monday-Friday from  
9AM-4PM
